D2

DRESSING · 2 FT 6 · AS AST-DR-009 (D3, THE BATHROOM, IS THE SAME AT 2 FT 3 — AST-DR-008)

D1

DOOR · 3 FT · AS AST-DR-001

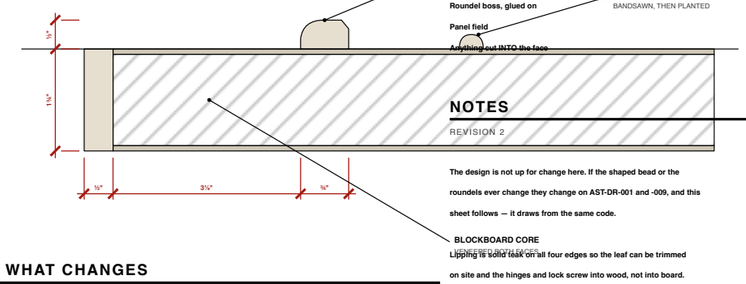

THE SAME DRAWING AS THE DOOR SHEETS — NOT A REDRAW

Both elevations are generated from the door sheets' own code, so the design cannot drift. Nothing on this sheet changes how the door LOOKS — only how it is made.

1 · THROUGH THE LEAF

SECTION ACROSS A PANEL · EVERY MEMBER PLANTED ON

2 · WHAT CHANGES

THE SAME MEMBERS, MADE SEPARATELY AND GLUED ON

Panel field

was: sunk ½" into the solid

now: stays FLAT — the ovolo round it does the work

Ovolo sticking

was: worked on the stile edge

now: run as a separate ¾" × ½" moulding, mitred on

Shaped bead

was: carved into the panel face

now: bandsawn to the curve in ¼" × ¼", planted on

Corner roundels

was: carved bosses

now: turned discs Ø1" × ¼", glued on

The leaf

was: solid teak, 1¾"

now: 1⅛" blockboard, ½" lipping, veneer both sides

RELIEF

FACE OF THE VENEER = DATUM 0

Blockboard core	1⅛"
Veneer, each face	0.6
Solid lipping, four edges	½" WIDE
Leaf overall	1¾"
Ovolo, planted	¾" W · ½" OUT
Shaped bead, planted	½" W · ¼" OUT
Roundel boss, glued on	Ø1" · ¼" OUT
Panel field	FLAT · 0
Anything cut INTO the face	NONE

NOTES

REVISION 2

The design is not up for change here. If the shaped bead or the roundels ever change they change on AST-DR-001 and -009, and this sheet follows — it draws from the same code.

Lipping is solid teak on all four edges so the leaf can be trimmed on site and the hinges and lock screw into wood, not into board.

Veneer both faces of the core and balance it: same thickness back and front, or the leaf will bow.

Ovolo, bead and bosses in solid teak, polished to match. They are small enough to take solid without moving, and they give a crisper arris than a cut face would.

Set the bead out from the panel opening, not from the leaf edge, so the four roundels land exactly on the corners of the curve.

OPEN — glue and pin, or glue only? Pins need filling and the filler shows through polish. Glue and cramp if the shop can.

A STUDY IN TEAK
