Inner front	18 BWP, teak veneer both faces, top edge scooped for a finger. No handle.

NOTES

REVISION 2

Open the big drawer: the inner one stays put. Pull it and it comes out 410 behind the big front, over the bottles — the tray in the kitchen drawer photographed.

Both are U-boxes. The waste pipe drops through their notches whichever drawer is shut; neither may be solid across the back.

It can never pass the big front — that front is solid. Shut, it stands 22 behind it.

Below the inner drawer: 324 clear — tall bottles stand.

Normal version: the pipe is off centre, which leaves the inner drawer a 25 right arm. Too thin to keep — that arm is left off and the inner drawer is an L.
