

DRESSING DOOR

D2 · 2 FT 6 · THE CARVED HEAD

NOTES

REVISION 8

The lining is 2 in on the face. The moulding lays 4 in outside it, all round — so the jambs are 6 in wide, and over the opening the moulding head sits 6 in ABOVE the leaf, not on top of it.

The jambs are reeded. Across the head the moulding is STEPPED, not reeded — the reference has no reeding there.

A plinth block takes each jamb down over the marble skirting.

RELIEF

DATUM 0 = FACE OF THE PLASTER · LINING AND MOULDING ARE COMMON TO ALL THREE DOORS · THE REST IS THE DRESSING DOOR'S CARVED HEAD

Lining, 2 in on the face

0 1/4" OUT

Moulding, 4 in, reeded

1 1/4" OUT

Reed grooves in the moulding face

3 IN

Corner block, flush with the moulding

1 1/4" OUT

Its sunk panel, two steps

0 1/4" AND 0 1/4" IN

Above the moulding, and only above it: a course of scallops, two small mouldings, and a crown that mitres back at each end.

A 4 in square block at each corner, with a small sunk moulding

inside it, ties head to jamb; the scallops run in three runs so a joint lands on each block edge. The crown lands at 8'-7 1/2".

The carved head is the DRESSING door's alone. Main and bathroom take the same lining and moulding, run straight across and stopped.

Scallop course

1 1/4" OUT

Scallops, cut back from its face

5 IN

Small mouldings, over the scallops

2" AND 2 1/4" OUT

Crown, the widest member

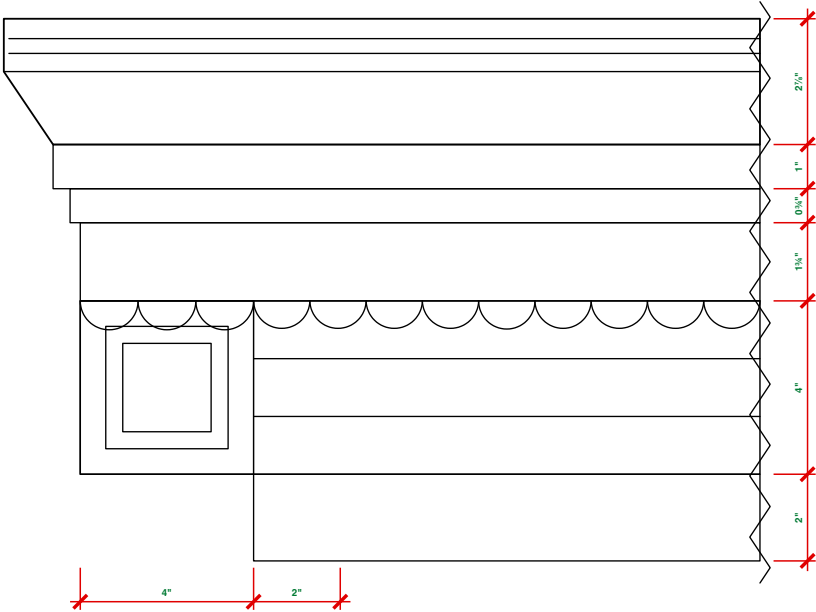

4 1/4" OUT

Plinth block, so the moulding dies on it

1 1/4" OUT
