THROUGH THE HEAD

NOTES

OPTION B · REVISION 2

This is the alternative to AST-DR-011. Below the corbels the two are the same casing: a 2 in lining with a 4 in reeded moulding outside it, a plinth block at the foot, the same leaf.

What changes is the head. Option A closes the corner with a moulded square block. Option B carries it on a carved corbel and lets the architrave, scallops and frieze die into it.

Each corbel is one piece, standing 0½" proud of the casing on the wall side with a serpentine edge: a palmette under a small cap, eleven chevrons on a spine, and a shield knot woven through a lozenge at the foot. Dressing door only — the others go plain. The crown lands at 8'-9¼" — 3 in higher than Option A — leaving about 4 in of wall to the ceiling.

A STUDY IN TEAK
