DETAIL 1 · THE END AT THE CURVE

PLAN

NOTES

REVISION 3

The partition's ends curve towards the bed, a proper curve — 5 blocks at each end on a 2'-2" radius, 65°, coming 1 ft 3 in forward (owner, 1¼" Oct).

The drawers fill the space between the two curves: one straight front from tip to tip, six bays, two drawers in each. The outer drawers' boxes are cut at the back to the curve, so every drawer runs straight out.

One bay open for the subwoofer — the only one deep enough for it.

Nothing that moves is curved.

ASSUMED

TELL ME IF ANY OF THESE IS WRONG

Height 1 ft 5½ in and depth 1 ft 3½ in in the middle, as before.

The 9292 burl, polished darker than the room (owner, 7 Oct), the grain running on across all six bays.

The slim brass bar on every drawer.

Every edge eased ⅛"; the top a full bullnose.

The right-hand cabinet door is gone: drawers, as asked.

TO DECIDE

Fronts: eased edges as drawn, or rounder — each front a small pill of its own?

Pulls: the brass bar, or push-to-open with none.

The curve: Eco Outdoor to confirm R 2'-2" for this block — joints ¼" on the bed side, 0 on the desk side.
