MAIN AND BATHROOM

D1 3 FT · D3 2 FT 6 · PLAIN CASING

Above the moulding, and only above it: a course of scallops, two small mouldings, and a crown that mitres back at each end.

A 4 in square block at each corner, with a small sunk moulding inside it, ties head to jamb; the scallops run in three runs so a joint lands on each block edge. The crown lands at 8'-7½".

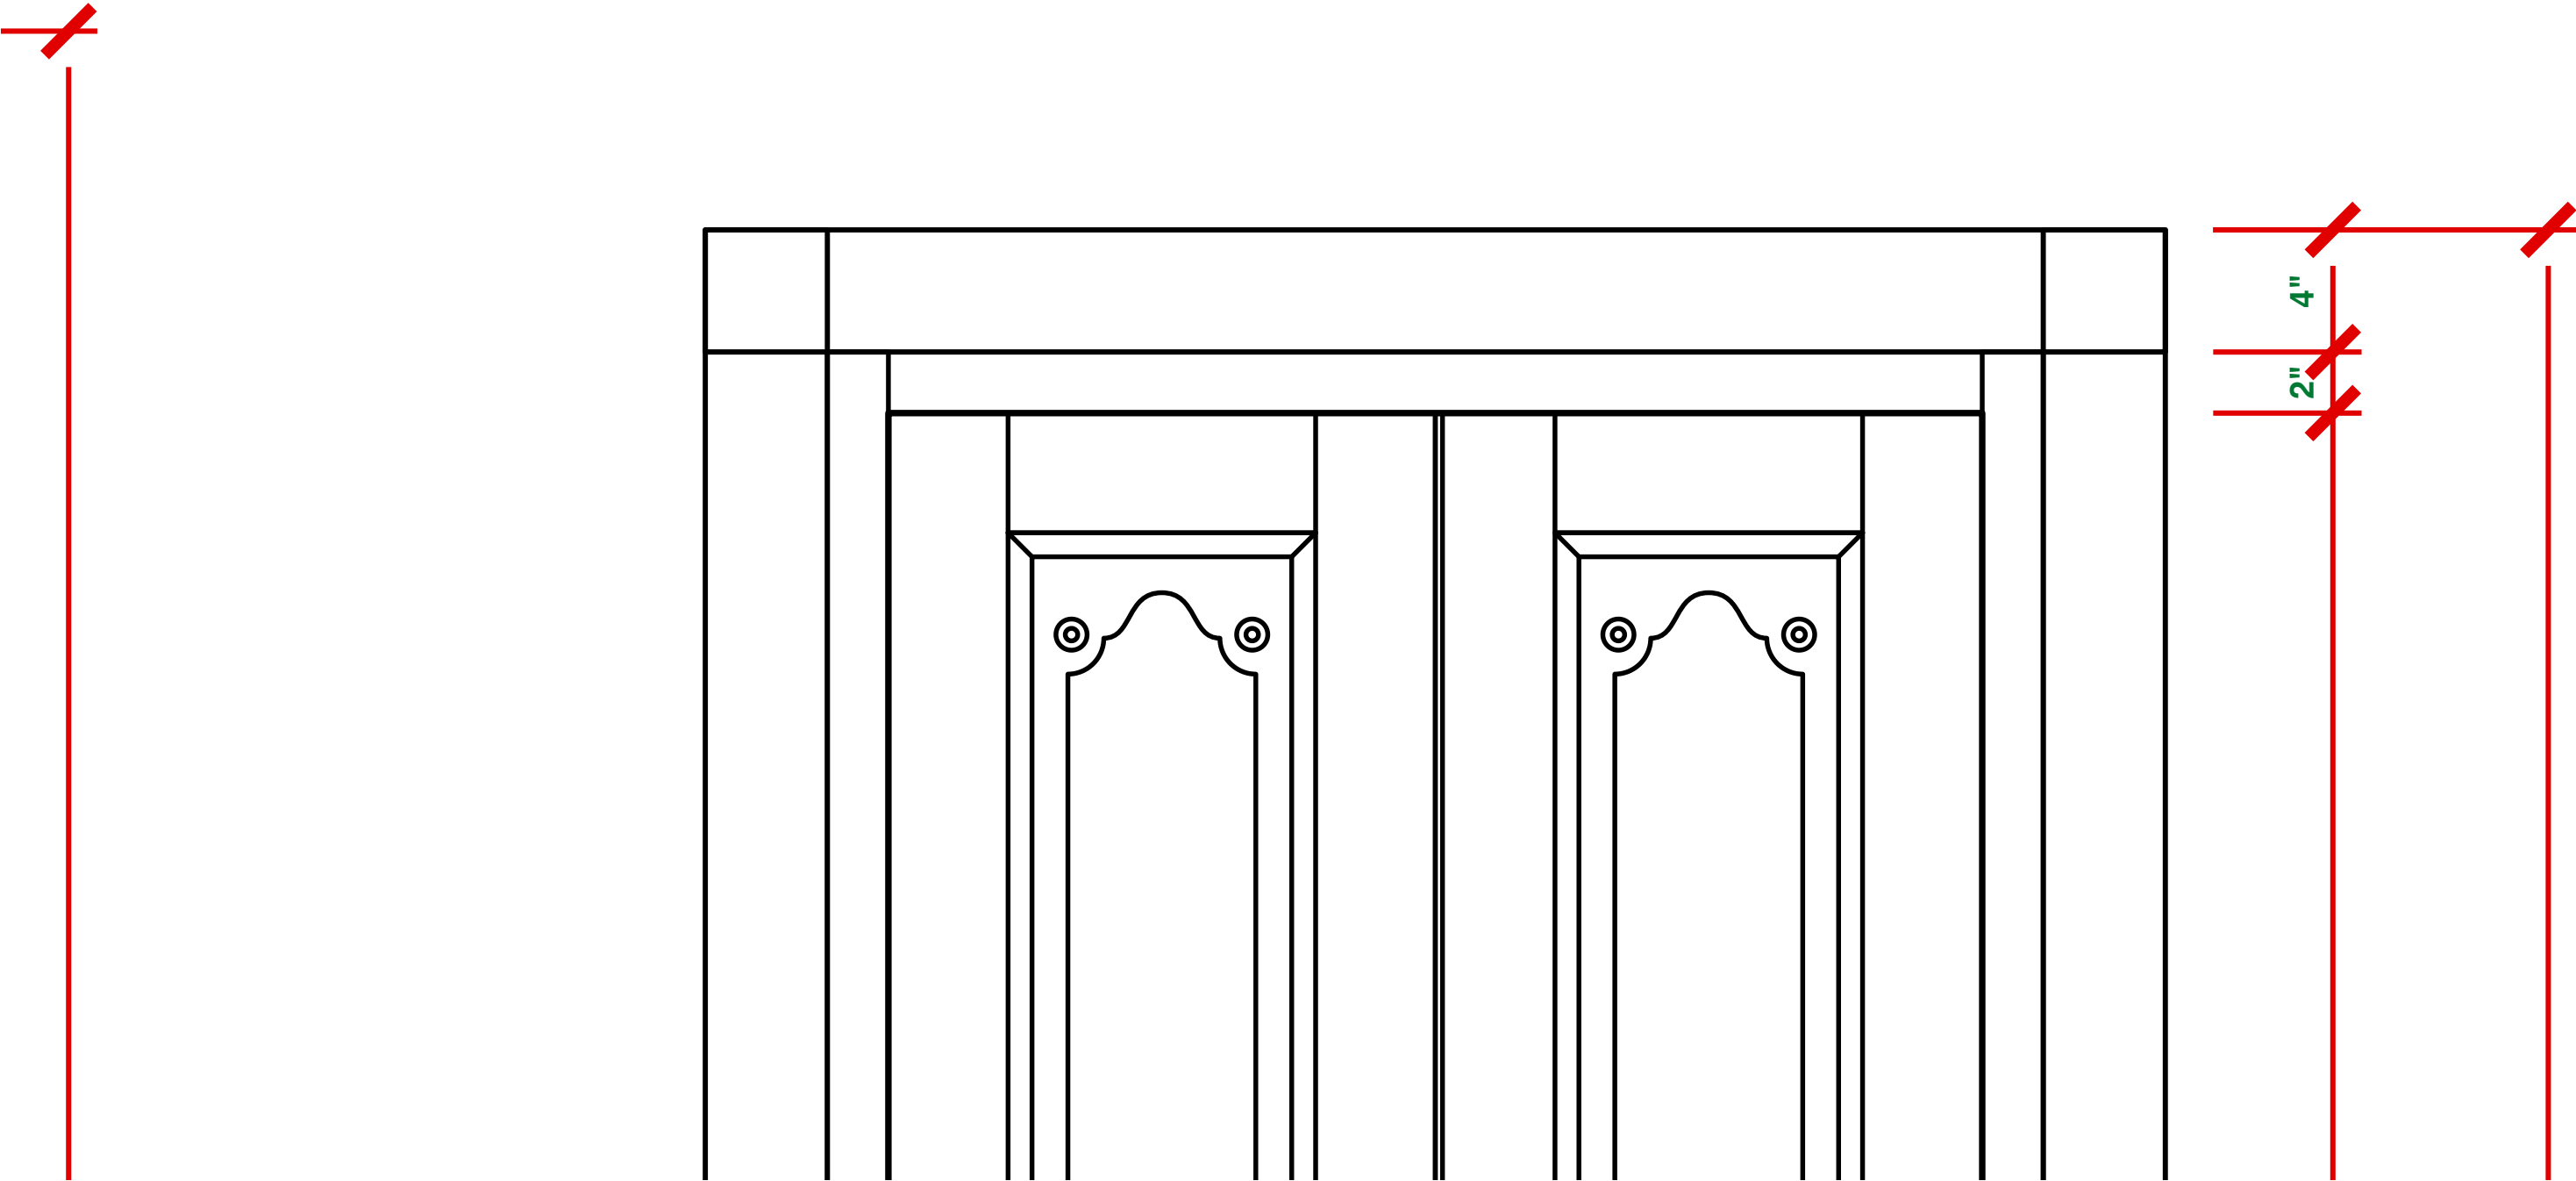

The carved head is the DRESSING door's alone. Main and bathroom take the same lining and moulding, run straight across and stopped.

E DOORS · THE REST IS THE DRESSING DOOR'S CARVED HEAD

NOTES

REVISION 8

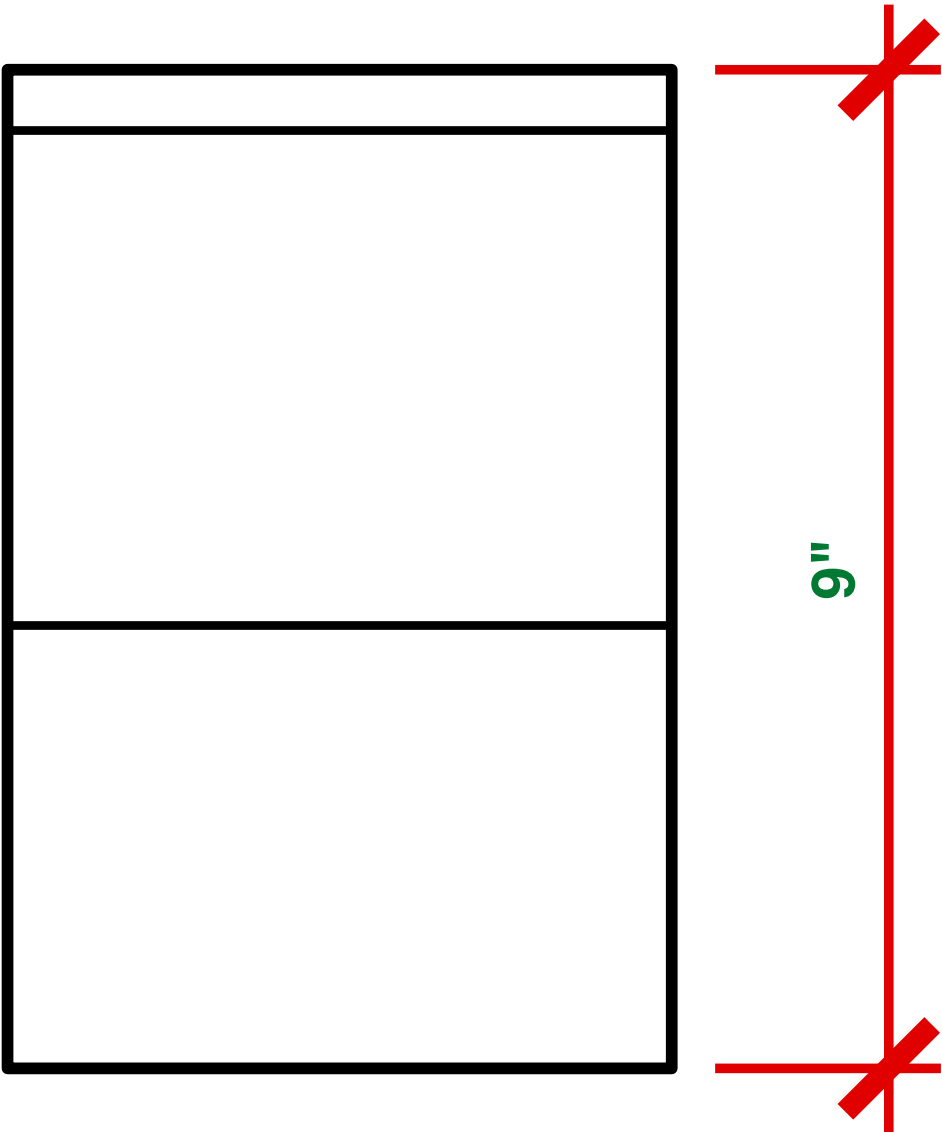

The lining is 2 in on the face. The moulding lays 4 in outside it, all round — so the jambs are 6 in wide, and over the opening the moulding head sits 6 in ABOVE the leaf, not on top of it.

The jambs are reeded. Across the head the moulding is STEPPED, not reeded — the reference has no reeding there.

A plinth block takes each jamb down over the marble skirting.
