1 · THROUGH THE LEAF

SECTION ACROSS A PANEL · EVERY MEMBER PLANTED ON

RELIEF
FACE OF THE VENEER = DATUM 0

- Blockboard core
- Veneer, each face
- Solid flipping, four edges
- Leaf overall
- OvOLO — PLANTED OVER, NOT WORKED INTO THE STILE
- Shaped bead, planted
- Roundel boss, glued on
- Panel field
- Anything cut INTO the face
- SHAPED BEAD SANDSAWN, THEN PLANTED

NOTES
REVISION 2

The design is not up for change here. If the shaped bead or the roundels ever change they change on AST-DR-001 and -009, and this sheet follows — It draws from the same code.

21

2 · WHAT CHANGES

THE SAME MEMBERS, MADE SEPARATELY AND GLUED ON

Panel field
was: sunk 0/16" into the solid
now: stays FLAT — the ovolo round it does the work
Ovolo sticking
was: worked on the stile edge
now: run as a separate 0/16" x 0/16" moulding, mitred on
Shaped bead
was: carved into the panel face
now: bandsawn to the curve in 0/16" x 0/16", planted on
Corner roundels
was: carved bosses
now: turned discs 0/16" x 0/16", glued on
The leaf
was: solid teak, 1 1/2"
now: 1 1/2" blockboard, 0/16" flipping, veneer both sides

BLOCKBOARD CORE
When making the core, the 1 1/2" x 3/4" x 1/2" teak trim is cut on site and the hinges and lock screw into wood, not into board.
Veneer both faces of the core and balance it: same thickness back and front, or the leaf will bow.
Ovolo, bead and bosses in solid teak, polished to match. They are small enough to take solid without moving, and they give a crisper finish than a cut face would.
Set the bead out from the panel opening, not from the leaf edge, so the four roundels land exactly on the corners of the curve.
PEN — glue and pin, or glue only? Pins need filling and the filler flows through polish. Glue and clamp if the shop can.

NOTES

REVISION 2

The design is not up for change here. If the shaped bead or the roundels ever change they change on AST-DR-001 and -009, and this sheet follows — it draws from the same code.

BLOCKBOARD CORE
VENEERED BOTH FACES
Lipping is solid teak on all four edges so the leaf can be trimmed on site and the hinges and lock screw into wood, not into board.

Veneer both faces of the core and balance it: same thickness back and front, or the leaf will bow.

Ovolo, bead and bosses in solid teak, polished to match. They are small enough to take solid without moving, and they give a crisper arris than a cut face would.

Set the bead out from the panel opening, not from the leaf edge, so the four roundels land exactly on the corners of the curve.

OPEN — glue and pin, or glue only? Pins need filling and the filler shows through polish. Glue and cramp if the shop can.
