NOTES

REVISION 2

Open the big drawer: the inner one stays put. Pull it
and it comes out 1'-4¹/₈" behind the big front, over the
bottles — the tray in the kitchen drawer photographed.

Both are U-boxes. The waste pipe drops through their
notches whichever drawer is shut; neither may be solid
across the back.

It can never pass the big front — that front is solid.

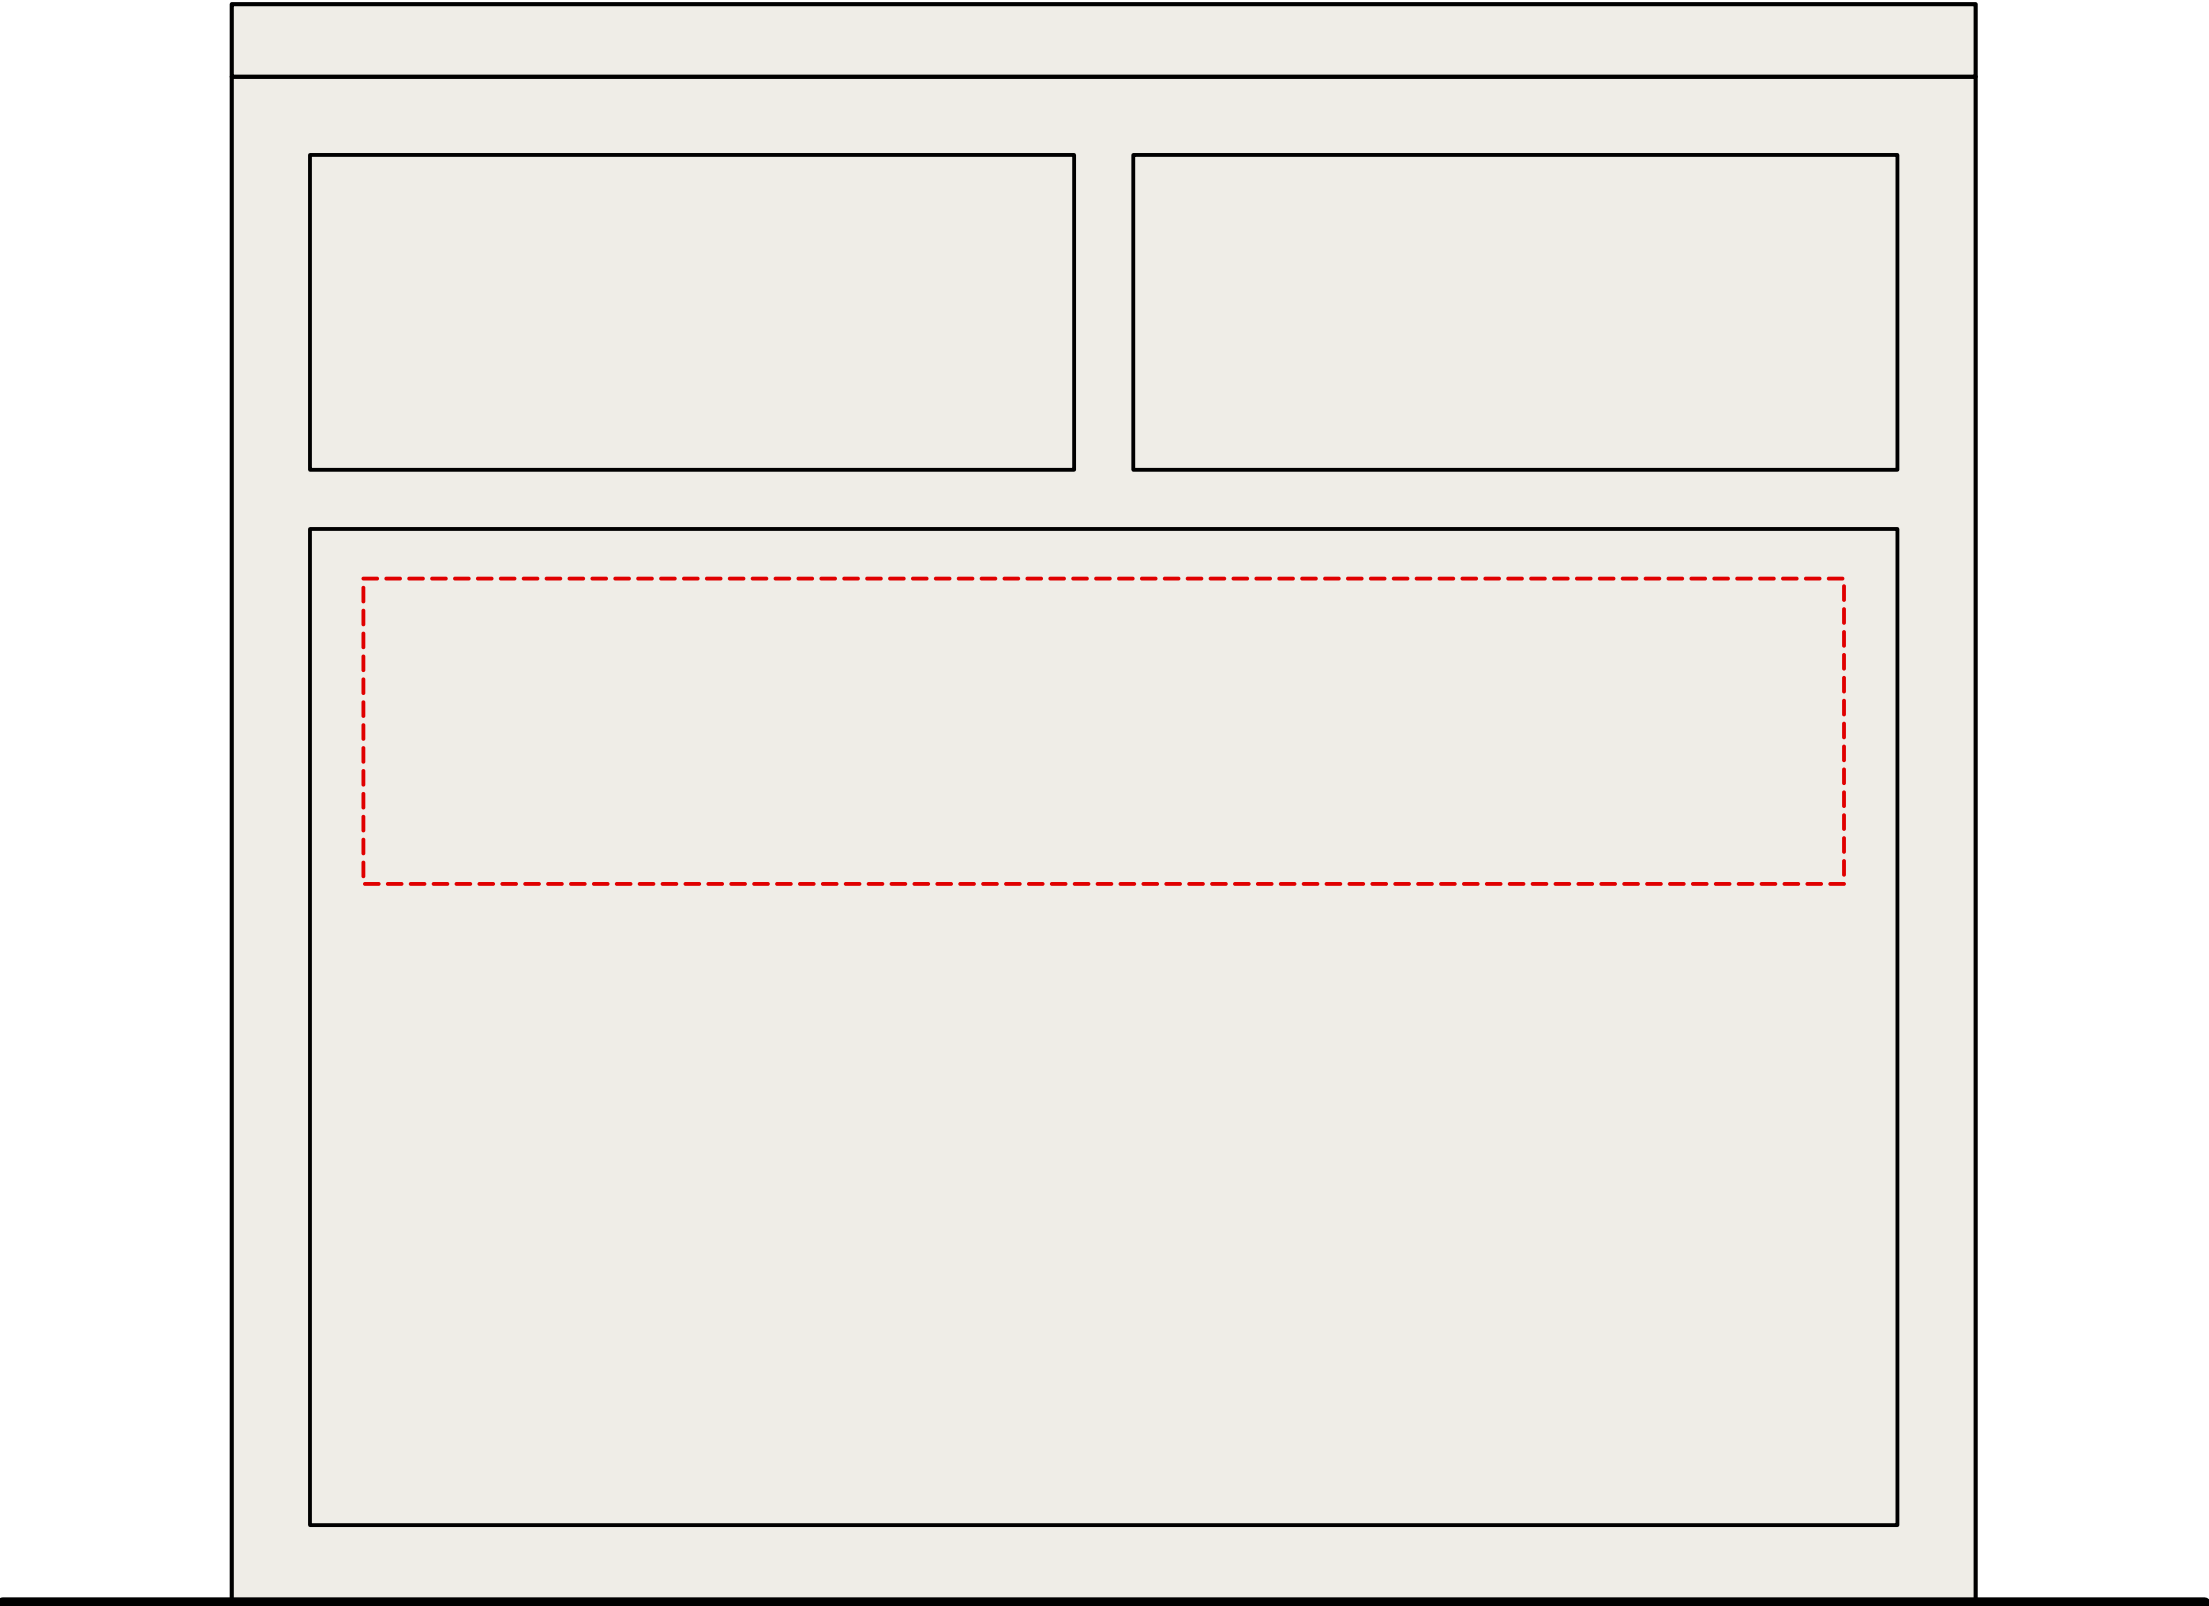

Shut, it stands 0⁷/₈" behind it.

Below the inner drawer: 1'-0³/₄" clear — tall bottles stand.

Normal version: the pipe is off centre, which leaves
the inner drawer a 1" right arm. Too thin to keep — that
arm is left off and the inner drawer is an L.
